

Unloading Procedure:

Exit the front of the bus and tell the driver you are going to remove your bike from the bike rack. Cautiously approach the front of the bus and lower the support arm. Lift your bicycle out of the wheel well. If the bicycle rack is empty, please lift the support arm and restore the rack to its unused position. Move quickly to the curbside and signal to the bus driver to proceed.

Loading and unloading of all bicycles is the responsibility of the passenger. Drivers may not assist in the loading and unloading of the bicycles. Bicycle racks can accommodate 2 bikes. If the bicycle rack is full, please wait for the next bus. Also, please note that bicycles are not permitted inside the bus. They are permitted only on bicycle racks on the front of the bus. CCT is not responsible for lost or stolen bikes or bike damage caused by improper loading.

For more information check our Web site at www.cobbdot.org or call CCT Customer Service at (770) 427-4444.

Cobb Community Transit
proudly presents

Bikes on Buses

CCT is one of the first public transit agencies in the state to provide this type of service to its customers. This program is designed to provide more options for the intermodal commuter which ultimately reduces the number of single occupancy vehicles on Cobb's roadways and helps to clean up the air.

Here's how it works

To load your bike:

- Inform the driver that you are going to use the bicycle rack, and cautiously approach the rack, which is located on the front of the bus.

- Use one hand to support your bike and with the other grasp the silver handle and pull it up to lower the rack.

- Lower the rack.

- Securely place bicycle on bike rack.

- Pull the metal support arm out and up over the front wheel of your bike.

- Completely place the metal arm over front wheel of bike.

- Board the bus!
